

Notification

- The Panel displays List of alerts associated with the User account

The screenshot displays the 'Map Notification' interface. On the left is a sidebar with navigation options: Alarm Settings, Device Setup, Geofences, Map Notification (highlighted), Messaging Setup, and Recipient Setup. The main panel shows a table of existing notifications:

Event Name	Priority	Alert Sound	Display On Screen	Display Time (sec.)	Delete
Geo Fence Out	Low	Off	Off	10 Seconds	
Idling	Low	Off	Off	10 Seconds	

Below the table is the 'Add New Map Notification' form with the following fields:

- Event Name: Select Event (dropdown menu)
- Display Time (sec)*: 10 (input field)
- High Priority:
- Alert Sound:
- Display On Screen:
- Add (button)

Red arrows indicate the flow of information: from the 'Add New Map Notification' form fields to the table, and from the table's 'Delete' icons back to the form's 'Add' button.

- To add a new alert, select Event Name from the drop-down list and select alert display time in sec, Priority of alert, Sound when alert will come, and "Display on screen" if you see alert on your screen.
- clicks 'ADD' button to save.
- To delete an alert, click 'Delete icon' from respective alert.
