

## Nearest vehicle search by point

This function provides vehicles information closest to the selected point on map. Please follow the following step:

- In the 'Nearest Vehicle' Menu click on the Point Menu
- Double click on the map point from which you want to see vehicles. Click on OK button on Info window.

The screenshot displays the M-PROTEKT Gold software interface. The top navigation bar includes 'Mobilize/Immobilize', 'Geofence', and 'Nearest Vehicle'. A dropdown menu is open under 'Nearest Vehicle', showing 'Vehicle' and 'Point' options. A red arrow points from the 'Point' option to a specific location on the map. Another red arrow points from the map location to a 'Select Point Confirmation !!' dialog box with 'Yes' and 'Cancel' buttons. The interface also features a search bar, a table of vehicle data, and a sidebar with 'Daily Activity Log' and 'Event Time' sections.
